

1. Avalanche Behavior of weakly perturbed bead piles, G.R.Maktabdaran and F.Ebrahimi, *J.Stat.mech.*(2014)P04003
2. Investigation of adsorption properties of CS 2 on interior and exterior surfaces of single-walled silicon-carbide nanotubes and effect of applied electric field: electronic structure, charge density and ... , Hamideh Ghiassi and Heidar Raissi, *RSC Adv.*, (2015) 5, 84022
3. Dependence of the Dynamics of Spontaneous Imbibition into Carbon Nanotubes on the Strength of Molecular Interactions, Fatemeh Ebrahimi and Aref Pishevar, *J. Phys. Chem. C*, 2015, 119 (51), pp 28389–28395
4. Temperature-dependence of wetting properties of carbon nanotubes, Fatemeh Ebrahimi and Melika Gholamian Moghaddam, *Physica A* 453 (2016) 271-277
5. Uncertainties in the Capillary Filling of Heterogeneous Water Nanochannels, Farzaneh Ramazani and Fatemeh Ebrahimi, *J. Phys. Chem. C*, 2016, 120 (23), pp 12871–12878
6. Water imbibition into nonpolar nanotubes with extended topological defects, F. Ramazani and F.Ebrahimi (2016) *Chemical Physics*, 476, 23–28.
7. A two-scale method for fast estimation of the charge-carrier diffusion coefficient in nanoporous semi-conductors, Fatemeh Ebrahimi and Hakimeh Koochi, *J. Phys.: Condens. Matter* 29(2017)025901
8. Nanojunction Effects on Water Flow in Carbon Nanotubes, Fatemeh Ebrahimi, Farzaneh Ramazani, Muhammad Sahimi, *Scientific Reports* (2018) 8:7752
9. Efficient Transport Between Disjoint Nanochannels by a Water Bridge, Muhammad Sahimi and Fatemeh Ebrahimi (2019) *Phys. Rev. Lett.* 122, 214506
10. Formation of a Stable Bridge between Two Disjoint Nanotubes with Single-File Chains of Water, Ebrahimi, F., Maktabdaran, G.R., Sahimi, M. *J Phys Chem B* 2020 124 (38), pp. 8340-8346
